1. Applicant's arguments with respect to claims 24-29, 32-37, 39-47, 52-57, 60-66, 68-87, 126-141 and 151-173 have been considered but are moot in view of the new ground(s) of rejection.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

3.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 174-177, 179, 184-186, 190-217 and 220 are rejected under 35 U.S.C. 102(b) as being anticipated by Chigot (5,484,168).

Chigot relates to a label construction comprising a liner sheet (2), and a facestock (7) attached to the liner sheet, the facestock including at least one weakened separation lines (13-15) defining at least in part a plurality of aligned facestock labels (7, 12). The liner sheet (2) includes at least one weakened separation line (13-15) separating it into a removable liner strip <sup>20</sup>(~~2~~) and a liner body position (~~2~~). The liner sheet bar is assumed to be (25) is shown as connected to strip (20).

The facestock would include ties because Chigot's die cutting of labels is not a "continuous" die cut.

Figure 1 of Chigot shows plurality of first and second labels separated by liner (5) in this space between said first and second labels.

For claim 192, the first and second liner strips can be (20) and (2) as shown in figure 2 of Chigot.

The label facestock extends out from an edge (22) of the liner sheet to meet the limitation of claim 193.

The facestock cut-lines defines a handle portion (16) separable as a unit from the liner sheet along line (17).

The intended use phrases such as "when in a separate position", "being positionable", "when in the removed position", "is positionable", "being separable", etc. have not been given patentable weight as said phrases are not found to be positive limitations.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 222-225 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chigot.

Chigot, as discussed above, fails to teach that the facestock includes three labels. It would have been obvious to one having ordinary skill in the art to modify Chigot to have three labels based on duplication of parts or optimization of usable labels based on routine experimentation.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1772

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 174, 212 and 214-217 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 174, the phrase "a liner sheet bar" could not be understood in the absence of any description in the Specification and drawings and said phrase is found to be indefinite.

Claims 212, 214, 215, 216 and 217 are improperly dependent from canceled claims 128.

9. Claims 142-150, 178, 180-183, 187-189, 218 and 219 are free of the prior art uncovered so far. The prior art fails to teach that the aligned facestock labels are interconnected by thin facestock necks, that the top edge of each label is free standing and unattached to the facestock, that the stack of tabbed divider sheet have staggered tabs, that the serially connected liner strip portions are interconnected by thin neck, that the thin neck portions of the facestock is uncoated.
